

Bolivarian Republic of Venezuela

Communiqué

The Bolivarian Republic of Venezuela repudiates all manifestations of hatred and calls for the extermination of the Palestinian people, which have been accompanying the Israeli genocidal campaign, inspired by the Nazi doctrine, against the people of Gaza, especially the recent pronouncement made by Minister Amichai Eliyahu, who, in addition to threatening the use of nuclear weapons, has called for the annihilation of all those who fly the sacred flag of the State of Palestine, which has become today the most worthy symbol of rebellion against Israeli barbarism.

Venezuela continues to urge the international community to mobilize and support the efforts undertaken by various countries that have announced the referral of the case to the International Criminal Court, so that responsibilities can be determined and the war crimes and crimes against humanity committed by leaders of the State of Israel against the Palestinian people, which have horrified the entire world in recent weeks, can be effectively judged.

The systematic assassinations against the civilian and defenseless population, organized by Israel in Gaza, must be stopped immediately, humanitarian aid must flow without any restriction to the affected areas and the independence of Palestine must be guaranteed by all international bodies and organizations, as recently mandated by the General Assembly of the United Nations.
