

Bolivarian Republic of Venezuela

# Communiqué

The Bolivarian Republic of Venezuela expresses its repudiation of the cynical remarks made by the President of Israel, Isaac Herzog, who has shamelessly criticized the dignified position taken by Latin American countries, including Venezuela, regarding the genocide committed by his country against the noble Palestinian people.

Venezuela reminds the President of the State of Israel that his acts go far beyond the limits of decency and respect, and constitute themselves into War Crimes and Crimes against Humanity, which sooner or later will be judged under international law. While that occurs, Israel must cease its indiscriminate attacks on the civilian population and must stop the systematic massacre it commits against the Palestinian people, especially women and children.

The Venezuelan government joins the demonstrations of numerous Latin American countries who have called for an immediate ceasefire and condemned Israel's policy of Nazi extermination against the Palestinian people. In this regard, we will keep our voice raised, denouncing the barbarity and promoting actions to ensure compliance with UN resolutions in favor of the realization of a free Palestinian State.
